>Can you give me more context on your model training timeline/plans? I.e. when were you planning on starting to train the model for GA (pre-training, not fine-tuning) and when's the latest that we'd need to get the data for it to end up in the model?

Melanie Kambadur (4/06/2023 15:51:09 PDT):

>then we can include me and moya in the meeting as well, maybe george too, in case ahmad has more technical questions (he had a bunch for me earlier so I suspect he might), but we'll not block on preparing more data
